The Best Way to Enjoy America

(314SO Floorplan Shown w/Royal Onyx Decor Selection)

(295TH Floorplan Shown w/Spiced Parsley Interior Decor)

Designed to be the value leader in the Class C Motorhome market, the Freedom by Coachmen™ has earned its stripes. Large exterior storage bays and the Stow-N-Go™ rear garage storage on most models let you take it all with you. The interior is also well equipped with a double door refrigerator, deluxe pressed cabinet doors, high spout faucet, self edged countertops, and easy to clean vinyl flooring.

Decor Selections

Dazzling interiors feature skillfully coordinated upholstery and window treatments. Coachmen RV chooses only top-grade fabrics wear-dated as heavy-duty. These fabrics have been tested for durability beyond 15,000 double rubs (in and out action) to simulate heavy usage. An average chair in an American home is subjected to only 3,000 double rubs per year.

2006 Freedom Features Galore

By Coachmen™

Our standard **metal drawer guides with glide wheels** provide a friction free sliding drawer that is extremely durable. The drawer glides also act as a catch so that the drawer will not slide open during travel. Simply lift up and pull to open the drawers.

The Freedom 314SO features an enormous **side storage bay** that provides plenty of space for your stored gear.

SAFETY FIRST

Safety is paramount at Coachmen. All units come standard with an **LP leak detector, fire extinguisher, smoke detector and Carbon Monoxide detector.**

SAFETY FIRST

While the law requires only enough seat belts to equal the number of sleeping positions, Coachmen puts **seat belts at every fixed seating location.** All of our seat belts meet the FMVSS standards as stated by the government.

The **high spout faucet** is a nice residential touch that makes for simple cleanup of your taller pots and pans. You can also easily fill up your ice-tea jar on a hot summer day.

The handy **cockpit convenience area** features room for 2 large drinks, \$.05, \$.10, and \$.25 change holder, and extra miscellaneous storage for your essentials like sunglasses, road maps, and tissues.

The standard **double door refrigerator** is designed for maximum storage capacity with door storage and a handy freezer shelf. A convenient refrigerator light is also standard for those midnight cravings.

SAFETY FIRST

SureLine™
Electrical Harness
By Coachmen

Coachmen's **SureLine™ Electrical Harness** provides color coded wiring and specific wiring schematic for easy serviceability. High quality automotive electrical connectors and autoloom protective covering make for a reliable and durable harness. The wires are grouped together and neatly tucked into the framework under the coach, safe from road debris.

SAFETY FIRST

All Coachmen Class C Motorhomes utilize **Duratube™** full length copper LP lines with double flared ends to ensure a tight seal and

years of corrosion free use. We also run our copper lines, protected by a sleeve, through the frame, where they are protected from road damage.

It doesn't have to be a weekend project figuring out how to fill, drain, or winterize your RV. Our easy to use **Water Works™ Utility Panel** with large dials, simply displays how to perform each function. No lengthy explanations or wordy booklets are necessary (N/A 200 RB).

The large **Stow-N-Go™ garage storage** is standard on most

STOW-N-GO™
By Coachmen

models and provides an enormous amount of organized storage space.

GVWR (Gross Vehicle Weight Rating): The maximum permissible weight of the unit, including the UVW plus all fluids, cargo, optional equipment and accessories. For safety and product performance, do not exceed the GVWR.

CW (Curb Weight): The weight of the unit without factory or dealer installed options, plus allowance for the weight of full fuel capacity. The "payload capacity" for all other fluids, cargo, occupants, optional equipment and accessories can be determined by subtracting the CW from the GVWR.

GAWR (Gross Axle Weight Rating): The total weight each front/rear axle, suspension and tire system is designed to carry. When loading the unit, care should be taken to balance cargo weight in consideration of the GAWRs.

GCWR (Gross Combined Weight Rating): The maximum total weight of the loaded unit, plus a tow vehicle. This includes the weight of both the unit and tow vehicle, fuel for each, all other fluids, cargo, occupants, optional equipment and accessories.

Wider Widths: Numerous Coachmen floorplans feature the "wide body" design concept, which gives you significantly enhanced interior living space and innovative floorplans.

In making your purchase decision, you should be aware that a few states restrict access on some or all roads within the state to vehicle with a maximum 96" width, although special road usage permits may be available. Vehicles up to 102" in width are permitted in the vast majority of states. You should confirm the road usage laws in the states of interest to you before making your purchase decision. If width is of concern to you, we invite you to consider the broad array of other Coachmen models offered in the standard 96" width.

IMPORTANT NOTE: All capacities are approximate, and all dimensions are nominal. Coachmen motorhomes are designed to allow for a wide variety of uses, extended trips with two people or short trips with multiple people. Accordingly, each unit allows ample room for sleeping, seating, fluids and cargo. While the customer is the beneficiary of this design, the customer also bears the responsibility to select the proper combination of passengers, cargo, load, and tow vehicle without exceeding the chassis weight capabilities. Consumer may need additional braking capacity to tow loads greater than 1000 pounds.

Seat belts should always be worn for passenger safety. Seat belts are provided at most locations to allow convenience in selecting which seat to occupy. However, it is not intended that all seating positions equipped with a seat belt may be occupied while the vehicle is in motion, without regard to other weight factors.

All Coachmen motorhomes are designed to ensure that the number of passengers allowed while the vehicle is in motion will always at least equal the stated sleeping capacity. Though extra seat belts may be provided, for your safety and the proper operation of your vehicle, limit your passengers to the number allowed by the Net Carrying Capacity of your vehicle.

All information contained in this brochure is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Coachmen reserves the right to make all such changes without notice, including changes in prices, colors, materials, equipment and specifications, as well as the addition of new models and the discontinuance of models shown in this brochure. Therefore, please consult with your Coachmen dealer and confirm the existence of any materials, design or specifications that are material to your purchase decision.

QUALITY BY DESIGN

Coachmen RV is committed to providing a high quality, reliable, and innovative product. We know that quality extends far beyond the "glitz" of a recreational vehicle and often, the most important aspects of quality are hidden in the design and construction of the coach. That's why Coachmen designs quality into our products up-front, through computer aided design and analysis software. This helps to assure appropriate weight distributions, structural integrity, alignment of the various parts and components and overall reliability of the design.

Our attention to quality does not stop on the computer screen, as all of our major product designs undergo rigorous road tests, rain booth testing, complete compliance audits for all codes, standards and safety related items, and comprehensive product audits.

Coachmen designs, builds and markets a superior product, for reasons that may not always be easy to see, however are very easy to appreciate down the road. Our hidden quality equates to high value, which can be critical to your long-term satisfaction.
